

MARYLAND Department of Health

Public Health Preparedness and Situational Awareness Report: #2020:31

Reporting for the week ending 08/01/20 (MMWR Week #31)

August 7th, 2020

CURRENT HOMELAND SECURITY THREAT LEVELS

National: No Active Alerts

Maryland: **ENHANCED** (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics): Graphical representation is provided for all syndromes (excluding the “Other” category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census. Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE). Baltimore, MD: Maryland Department of Health; 2019.

Gastrointestinal Syndrome

There were no Gastrointestinal Syndrome outbreaks reported this week.

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	13.26	14.94	15.87	10.20	13.05
Median Rate*	13.11	14.80	15.46	10.13	12.98

** Per 100,000 Residents*

(report continues on next page)

Respiratory Syndrome

There were eighty (80) Respiratory Syndrome outbreaks reported this week: twenty-four (24) outbreaks of COVID-19 in Assisted Living Facilities (Regions 1&2,3,4,5), one (1) outbreak of COVID-19 in a Camp (Region 3), five (5) outbreaks of COVID-19 in Correctional Facilities (Regions 1&2,3,4), four (4) outbreaks of COVID-19 in Daycare Centers (Regions 3,4,5), one (1) outbreak of COVID-19 in an Event Venue (Region 5), twelve (12) outbreaks of COVID-19 in Group Homes (Regions 1&2,3,5), two (2) outbreaks of COVID-19 in Hospitals (Region 3), twenty two (22) outbreaks of COVID-19 in Nursing Homes (Regions 1&2,3,4,5), one (1) outbreak of COVID-19 in an Organization (Regions 1&2), three (3) outbreaks of COVID-19 in Outpatient Facilities (Regions 3,5), one (1) outbreak of COVID-19 in a School (Region 4), one (1) outbreak of COVID-19 in a Shelter (Regions 1&2), two (2) outbreaks of COVID-19 in Substance Abuse Treatment Programs (Region 3), one (1) outbreak of COVID-19 in a Workplace (Region 3).

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.54	14.85	15.21	10.07	12.85
Median Rate*	12.10	14.21	14.35	9.69	12.32

* Per 100,000 Residents

(report continues on next page)

Fever Syndrome

There were no Fever Syndrome outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.08	3.92	4.15	3.06	3.54
Median Rate*	3.02	3.80	3.97	2.92	3.40

*Per 100,000 Residents

(report continues on next page)

Localized Lesion Syndrome

There were no Localized Lesion Syndrome outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.16	1.73	2.00	0.88	1.38
Median Rate*	1.01	1.68	1.99	0.83	1.34

* Per 100,000 Residents

(report continues on next page)

Rash Syndrome

There were no Rash Syndrome outbreaks reported this week.

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.22	1.62	1.71	0.94	1.34
Median Rate*	1.21	1.57	1.55	0.92	1.29

* Per 100,000 Residents

(report continues on next page)

Neurological Syndrome

There were no Neurological Syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.81	0.99	0.91	0.64	0.84
Median Rate*	0.81	0.91	0.88	0.57	0.79

* Per 100,000 Residents

(report continues on next page)

Severe Illness or Death Syndrome

There were no Severe Illness or Death Syndrome outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.65	0.88	0.84	0.54	0.73
Median Rate*	0.60	0.84	0.88	0.48	0.70

* Per 100,000 Residents

(report continues on next page)

SYNDROMES RELATED TO CATEGORY A AGENTS

Botulism-like Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on, 7/19 (Regions 1&2,4), 7/21 (Region 5), 7/22 (Region 5), 7/23 (Regions 3,4), 7/24 (Regions 1&2,4), 7/25 (Regions 1&2,3), 7/27 (Region 5), 7/28 (Regions 1&2), 7/29 (Regions 1&2,4), 7/30 (Regions 3,5). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.08	0.13	0.06	0.09	0.10
Median Rate*	0.00	0.11	0.00	0.04	0.08

* Per 100,000 Residents

(report continues on next page)

Hemorrhagic Illness Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on, 7/19 (Regions 1&2), 7/21 (Regions 1&2,4), 7/24 (Regions 1&2), 7/27 (Regions 1&2), 7/28 (Region 4), 7/30 (Regions 1&2), 8/1 (Region 4). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.05	0.17	0.04	0.15	0.14
Median Rate*	0.00	0.11	0.00	0.09	0.10

* Per 100,000 Residents

(report continues on next page)

Lymphadenitis Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on, 7/20 (Regions 1&2), 7/27 (Regions 1&2), 7/30 (Region 4). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.39	0.60	0.40	0.39	0.49
Median Rate*	0.40	0.55	0.44	0.35	0.45

* Per 100,000 Residents

(report continues on next page)

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Coronavirus Disease 2019 (COVID-19) Situation Summary

On March 5th, 2020, the Maryland Department of Health announced the first cases of coronavirus disease 2019 (abbreviated COVID-19) in the State of Maryland.

Confirmed COVID-19 Case Counts in Maryland by County (As of August 7th, 2020)

County	Number of Confirmed Cases
Allegany	280
Anne Arundel	7,243
Baltimore City	12,239
Baltimore County	12,915
Calvert	672
Caroline	445
Carroll	1,530
Cecil	689
Charles	1,983
Dorchester	365
Frederick	3,050
Garrett	46
Harford	1,922
Howard	3,779
Kent	238
Montgomery	18,139
Prince George's	23,372
Queen Anne's	420
Somerset	133
St. Mary's	962
Talbot	384
Washington	1,003
Wicomico	1,322
Worcester	675
Total	93,806

The most up-to-date information may be found on the Maryland Department of Health website at <https://coronavirus.maryland.gov>.

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October 2019 through May 2020). **Due to the COVID-19 pandemic, influenza reporting will be extended to the beginning of the 2020-2021 reporting season (MMWR Week 40/Week Ending October 3, 2020).**

Influenza-like Illness

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	10.43	14.27	13.56	12.06	13.05
Median Rate*	7.66	10.50	9.50	8.97	9.62

* Per 100,000 Residents

(report continues on next page)

Influenza-like Illness Contacts by Week

Disclaimer on eMEDS flu related data: These data are based on EMS Pre-hospital care reports where the EMS provider has selected “flu like illness” as a primary or secondary impression of a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. These data are reported for trending purposes only.

(report continues on next page)

Over-the-Counter Influenza-Related Medication Sales

There was no appreciable increase above baseline in the rate of OTC Medication Sales during this reporting period.

OTC Medication Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.34	4.26	2.60	7.61	5.34
Median Rate*	2.62	3.32	2.21	6.90	4.58

* Per 100,000 Residents

(report continues on next page)

Over-the-Counter Thermometer Sales

There was no appreciable increase above baseline in the rate of OTC Thermometer Sales during this reporting period.

Thermometer Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	2.78	2.64	2.13	3.50	2.94
Median Rate*	2.42	2.59	1.99	3.49	2.94

* Per 100,000 Residents

(report continues on next page)

SYNDROMIC OVERDOSE SURVEILLANCE

The purpose of this section is to characterize non-fatal ED visit trends for acute unintentional overdose by Heroin, Opioid or Unspecified substance among Maryland residents captured by ESSENCE data, including chief complaint and discharge diagnosis. ED visits that are identified as unintentional overdose by Heroin, Opioid or Unspecified substance include those with medical and non-medical use of a prescription Opioid or where the substance is not specified, given evidence that most fatal overdoses are Opioid-related.

In preparation for the release of new ESSENCE queries for identifying heroin, opioid and all drug overdoses, please note that we have removed the data chart showing unintentional overdose rates by heroin, opioid, or unspecified substances. These new data, when available, will be presented below.

(report continues on next page)

Naloxone Administration Data by Week

Disclaimer on eMEDS naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

(report continues on next page)

Naloxone Administration Data

Disclaimer on eMEDS Naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. Presently, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national, and global levels are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of August 7th, 2020, the WHO-confirmed global total (2003-2020) of human cases of H5N1 avian influenza virus infection stands at 861, of which 455 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

AVIAN INFLUENZA

AVIAN INFLUENZA (AUSTRALIA), 3 August 2020, Birds on [a free-range egg] farm near Lethbridge [Victoria] have tested positive for H7N7 avian influenza virus. Read More: <https://promedmail.org/promed-post/?id=7640343>

HUMAN AVIAN INFLUENZA

There were no relevant human avian influenza reports this week

NATIONAL DISEASE REPORTS

CORONAVIRUS DISEASE 2019 UPDATE – 343 (MULTISTATE), 4 August 2020, The new academic year is underway in some parts of the United States, with the 1st few days of school showing just how fraught reopening. Read More: <https://promedmail.org/promed-post/?id=7622848>

EASTERN EQUINE ENCEPHALITIS (MASSACHUSETTS), 4 August 2020, A Middleboro resident is the 1st person to test positive for the eastern equine encephalitis virus this year [2020] in Massachusetts. Read More: <https://promedmail.org/promed-post/?id=7642505>

INFLUENZA (08) (HAWAII), 4 August 2020, Health officials in Hawaii have reported a variant H3N2 (H3N2v) infection in a child younger than 18, the US Centers for Disease Control and Prevention (CDC) said today [Fri 31 Jul 2020] in its weekly flu update. The patient was not hospitalized and has recovered. Read More: <https://promedmail.org/promed-post/?id=7636630>

SALMONELLOSIS, SEROTYPE NEWPORT (MULTISTATE), 3 August 2020, Thomson International Inc. of Bakersfield, California is recalling Red, Yellow, White, and Sweet Yellow Onions shipped from [1 May 2020] through the present. Read More: <https://promedmail.org/promed-post/?id=7640358>

INVASIVE TICK (OHIO), 2 August 2020, On Friday [31 Jul 2020], the Ohio Department of Agriculture (ODA) announced that an exotic tick, known as the Asian longhorned tick [*Haemaphysalis longicornis*], has been found in Gallia County. Read More: <https://promedmail.org/promed-post/?id=7638301>

RABIES (MULTISTATE), 31 July 2020, There have been 9 confirmed rabid bats in San Bernardino County including 4 within the past 2 weeks [2nd half of July 2020] in Rancho Cucamonga, Fontana and Apple Valley. Read More: <https://promedmail.org/promed-post/?id=7632899>

INTERNATIONAL DISEASE REPORTS

CORONAVIRUS DISEASE 2019 UPDATE (344): (GLOBAL), 5 August 2020, With over 18 million cases reported today, and new cases rising by around 250 000 each day, now is not the time to be complacent. Read More: <https://promedmail.org/promed-post/?id=7646354>

SCRUB TYPHUS (CHINA), 5 August 2020, A man in Zhaoqing, neglecting precautions, developed fever, chills and weakness in both legs after being bitten by a mite, even being diagnosed with stroke before being confirmed to have scrub typhus in Guangzhou. Read More: <https://promedmail.org/promed-post/?id=7647899>

LISTERIOSIS (NEW ZEALAND), 5 August 2020, A 4th case of [listeriosis] has been confirmed in Tauranga [Bay of Plenty]. Read More: <https://promedmail.org/promed-post/?id=7647773>

SCOMBROID FISH POISONING (SWEDEN), 3 august 2020, Sweden has reported 3 outbreaks of histamine poisoning in tuna from Vietnam in the past 3 months. Read More: <https://promedmail.org/promed-post/?id=7641222>

FOODBORNE ILLNESS (CHINA), 3 August 2020, Suspected food poisoning in a Guangdong rice noodle roll shop causes 1 fatality; preliminarily determined to be bongkreikic acid poisoning. Read More: <https://promedmail.org/promed-post/?id=7640542>

SEVERE FEVER WITH THROMBOCYTOPENIA SYNDROME (CHINA), 3 August 2020, A woman in Nanjing, Jiangsu was recently confirmed at Jiangsu Province People's Hospital to have contracted the new bunyavirus, becoming the 37th person in the province [Jiangsu] to have been infected by this virus. Read More: <https://promedmail.org/promed-post/?id=7639052>

EBOLA UPDATE (DEMOCRATIC REPUBLIC OF CONGO), 3 August 2020, Another 3 Ebola cases have been confirmed in the Democratic Republic of the Congo (DRC) Equateur province Ebola outbreak, raising the total to 72, the World Health Organization (WHO) African regional office said on Twitter today [31 Jul 2020]. Read More: <https://promedmail.org/promed-post/?id=7626335>

TICK-BORNE ENCEPHALITIS AND BABESIOSIS (ENGLAND), 3 August 2020, A Hampshire [South East England] resident has been hospitalized as 2 others have fallen ill with rare infections spread by a tick bite. Read More: <https://promedmail.org/promed-post/?id=7636582>

FOODBORNE ILLNESS (JORDAN), 2 August 2020, 57 new food poisoning cases have been reported in Ain Al-Basha, the Director of Al-Balqa Health Affairs Directorate, Wael Al-Azab, has announced. Read More: <https://promedmail.org/promed-post/?id=7638029>

OTHER RESOURCES AND ARTICLES OF INTEREST

More information concerning Public Health and Emergency Preparedness can be found at the Office of Preparedness and Response website: <http://preparedness.health.maryland.gov/> or follow us on Facebook at www.facebook.com/MarylandOPR.

More data and information on influenza can be found on the MDH website:

NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
